G. & R. SUMMER GROWN WINTER RESTED, OWN ROOT ROSES

Very few persons even in the trade, realize to what mammoth proportions the own root Rose business has reached in the past few years. Our business has grown by leaps and bounds, and the end is not yet. It's easy to understand why. Because G. & R. own root Roses give satisfaction. They grow and bloom; they work year in and year out; they have permanency. Not so the budded Roses that are like "a flash in the pan" and gone. No wonder when the customers know about budded Roses they absolutely refuse to purchase and no one blames them. Give your customers the best, and the best are G. & R. own root Roses.

The Largest Rose Growers in the World

Although our stock of Roses for 1921 was several hundred thousand more than we ever grew, still we sold out early in the season and were compelled to turn down orders for three-quarters of a million Roses we could not supply.

One of our customers in Oregon says: "Several years ago we bought your Roses, then we made the attempt to grow them ourselves, then again we tried the California-grown Roses, but we are back with you and we are back to stay. No Roses do so well with us as the G. & R. Roses. We expect to plant more largely of your Roses each year."

This is why G. & R. Roses are finding a ready market everywhere they are tried.

Rose After-Satisfaction

When you buy G. & R. Roses you get along with them the after-satisfaction—that sense of realizing all the success that should come from planting quality Roses, the knowing that no better results are possible to be obtained outside of G. & R. Roses. It is the after-satisfaction that has compelled us to plan to grow for the coming season one million additional Roses. Think of it, the after-satisfaction of selling six million Roses, and demanding a million increase in one year. Going some! you say. Yes, but are you getting your share of this Rose after-satisfaction? If not, why not? Plant G. & R. quality Roses. None better, none so good.

To Our Patrons

In all the years that we have furnished the trade with fine roses we never have had as many of the standard varieties and the wealth of new creations we offer this season. We consider this year's roses the best we have ever grown.

We handle no field grown or budded roses. All of our roses are grown under glass on their own roots and are of splendid sizes. They are supplied in two and one quarter and four inch pot sizes.

There have never been enough roses to meet the demand and we invite you to place your order early. On orders placed now, you are not only assured of the choicest stock, but the widest selection of varieties.

HYBRID TEA ROSES

New Varieties and a Few that are Scarce

This is a class of recent creation, embodying the delicate shades and peculiar fragrance possessed by the Tea Roses combined with the vigor and more pronounced pink and crimson shades of color previously confined to the Hybrid Perpetual class. In our opinion the Hybrid Teas will supersede all others because of their superior constitution and marvelously free-flowering qualities. In a sentence, it may be said they combine all the better traits of the two classes from which they sprang, altogether a great advantage. Almost all are highly perfumed, an attribute absolutely essential to a perfect Rose. They are ever-bloomers and hardy in all but the most rigorous climate.

ANGELUS (H. T.)—Flower large, full (40 to 45 petals), form similar to Premier, but higher center, lasting; white, cream tint at center; fragrant. Foliage dark green, disease-resistant. Vigorous; upright; free bloomer. Similar to Kaiserin Auguste Victoria, but more double; blooms in winter, and keeps longer.

CAPT. F. BALD (H. T.)—Deep scarlet crimson, heavily flushed with blackish crimson; a very promising variety in a deep, rich color.

CHARLES K. DOUGLAS (H. T.)—Bud large, long pointed; flower large, full, double, sweet fragrance; color, intense flaming scarlet, flushed, bright velvety crimson. Foliage dark green; disease resistant; vigorous, upright grower; produces an abundance of blooms from June to October.

COL. OSWALD FITZGERALD (H. T.)—A brilliant Rose. Its blood-red velvety-crimson beautifully finished blooms are produced in great profusion on erect stems, branching, pure tea perfume. We have no hesitation whatsoever in describing this variety as excellent. Named in remembrance of Colonel Oswald Fitzgerald—a lover of roses—who perished with his chief, Lord Kitchener.

COMTESSE DE CASSAGNE (H. T.)—Flowers of varying color; rich coppery-pink shaded clear rose; sometimes comes pure yellow; very large, form very fine; growth vigorous; fragrant.

COUNTESS OF WARRICK—A lovely lemon-yellow, edged pink, of good size; free in growth and bloom; flowers held erect. Fine for massing.

COVENT GARDEN (H. T.)—Rich, deep crimson of splendid form, very full; a most promising red.

CRUSADER (Montgomery, 1920)—A big, strong growing variety, robust and rugged in every characteristic; the growth is heavy and the flower stems strong and heavy. It is free flowering, and the blooms are big and double, and in color a rich velvety crimson. A free flowering red Rose that is a wonder.

EARL GRAY (Double, Richmond) (H. T.)—A beautiful rich crimson scarlet; lovely pointed form; not a large Rose, but of medium size.

EDEL (H. T.)—Type, Florence Forrester; bud very large; flower very large, double, well built, stately; opens well in all weather; sweet fragrance. Color, white, with the faintest ivory shading toward base, passing to pure white. Foliage bold and distinct. Very vigorous grower; free bloomer.

ESME (H. T.)—Large, full flowers of creamy white, flushed carmine on back edge of petals; a "fancy" exhibition size.

FRANK W. DUNLAP (Dunlap, 1920)—Did you see it at the International Flower Show at New York the past spring? Its record at the exhibition was: Winning silver medal for the best new pink Rose and gold medal sweepstakes for the best seedling in the show. Frank W. Dunlap was the finest flower in the exhibition. Claimed to be better than Mrs. Charles Russell.

GOLDEN OPHELIA (H. T.)—This is a sturdy, stiff-stemmed grower, with beautiful foliage, quite closely set, and glossy. The flower is of medium size from a beautifully formed bud of bright golden yellow. Profuse bloomer.

HOOSIER BEAUTY (H. T.) (Dorner, 1915)—We use description of E. G. Hill Co.: "If you need a more profitable red Rose than the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance. We believe this Rose will make its mark as a garden variety."

HORTULANUS BUDDE (H. T.) (From Holland)—Color, dark red of fine shade. Blooms in great profusion throughout the summer; semi-double; just what Rose gardeners greatly desire.

J. G. GLASSFORD (H. T.)—Very free, and branching in habit, of vigorous growth, with large, dark green foliage. Flowers of the largest size and of immense depth of petals, buds long and pointed, of great substance; color, deep crimson lake which holds well; Hugh Dickson considers this one of the finest Roses that their firm has ever raised; gold medal of R. H. S. (Ireland).

LEGION (H. T.)—Bud, well shaped globular; flower, large, full, lasting, cerise-red throughout; fragrant; foliage large, glossy reddish green. Originally named American Legion, but name changed because objected to by association of that name.

MADAME BUTTERFLY—(New.) Is Hill's glorified sport of Ophelia. Seen and admired by thousands. All the color tones of Ophelia are intensified, making it a harmony of bright pink, apricot and gold. Ophelia ranks at the top in popularity and Madame Butterfly will surpass it. It averages more petals to the bloom; it produces more bloom to the plant because it makes more branches, every one carrying a bud. The tight buds are a lovely shade of Indian oak, yellow at the base; they are unique for corsages and for low table decorations; the opening flowers are perfect in form and texture, clear and brilliant in color and of delicious fragrance.

MARJORIE BULKELEY—Of strong, free branching growth; buds long and rounded, opening into buff, heavily flushed with rose, and finishing into silvery-pink; of ideal habit, opening freely in all kinds of weather. Grand garden Rose; awarded Gold Medal.

MRS. CHAS. LAMPLOUGH (H. T.)—An exhibition bloom of large size; color of soft lemon; growth, vigorous; free flowering. Gold Medal Rose of the British National Rose Society.

MRS. HENRY MORSE (H. T.)—Bud very large, long pointed, flower very large, high center, double, fragrant, color flesh-cream ground with a sheen of bright rose, deeply impregnated and washed vermillion with clear vermillion veining on petals; very vigorous grower, bearing an abundance of bloom.

MRS. H. D. GREENE (H. T.)—Color reddish bronze, opening to flame and coppery-pink; exceedingly free and fragrant; ample foliage of rich color; flowers on stiff, erect stems.

MRS. H. R. DARLINGTON—This is also a Gold Medal variety of the British N. R. S. Color, creamy-yellow; both free and fragrant; very perfect in form; a good grower.

MRS. S. K. RINDGE—Bud very large, long-pointed, stained cadmium-red; flower very large, cupped, semi-double, borne singly on long stem; lasting fragrant. Color deep golden-yellow, without tint of copper; becomes suffused with soft pink with age instead of fading. Foliage sufficient, large, leathery, glossy light green. Growth very vigorous, upright; abundant bloomer.

PILGRIM (Montgomery, 1920)—In color a beautiful shade of bright rose-pink. The bud, which opens perfectly, is long and of ideal form. Pilgrim is a Rose of good substance and petalage, and at any stage of development is perfect in color and form of flower. Its pronounced tea fragrance will attract all Rose lovers. It is prolific, and highly productive of first quality blooms. The stems are straight and strong, and there is no tendency to weaken at the neck. It takes water freely, and this quality makes it a good Rose for the store man, as it will keep when cut and retains its color and fragrance. It is the pink Rose to grow.

HYBRID TEA ROSES—Concluded

PREMIER (Hill, 1919)—Already too well known to need description. A magnificent novelty in the class with Russell. Deep rose; fragrant, thornless; free.

PRESIDENT WILSON (H. T.)—A delightful shade of salmon-pink, reminding one of the grand color of *Willowmere*, but clearer in tone. Flowers of large size and exhibition quality, freely produced on erect stems. A great Rose.

RED COLUMBIA (H. T.)—A brilliant scarlet-crimson of exquisite shade, a sport from Columbia; semi-double, one of the freest bloomers in existence; produces beautiful foliage in profusion;

has made a splendid record in the Government Trial Gardens at Washington, D. C.; never fails.

VICTORY—Glowing scarlet; blooms very large, pointed on very long stems; semi-double; a fine free-growing bedder; Gold Medal N. R. S.

WHITE OPHELIA (H. T.)—Sport of Ophelia. Resembles Ophelia, but stronger. Bud large, ovoid; flower large, well formed, semi-double, very lasting, borne singly on strong, average-length stem; strong, sweet fragrance. Color white, with slight pink tinge in center which disappears when bloom opens. Foliage sufficient; leathery, medium size, rich green. Vigorous, upright grower; an abundant and continuous obloomer.

HYBRID TEA ROSES, Standard Varieties

ANTOINE RIVOIRE (Pernet Ducher, 1896)—Called by the trade Mrs. Taft. Rosy-flesh on yellow ground. Forces.

BEAUTY OF STAPLEFORD (Bennett, 1880)—Rosy-crimson.

BESSIE BROWN (Alex. Dickson, 1899)—Creamy-white flowers; sweetly scented.

CHRISIE MACKELLAR (Alex. Dickson, 1913)—Crimson-carmine with shades of orange-pink.

COLONEL R. S. WILLIAMSON (Alex. Dickson, 1907)—Color satiny-white with deep blush center; blooms large.

COLUMBIA (Hill, 1918)—It is a big Rose, the open flower measuring six inches across. The color is a true pink, about the shade of a perfect Shawyer, deepening as it opens to glowing pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached and this color is enduring; a great Rose.

COUNTESS OF GOSFORD (McGredy, 1906)—Color, salmon-pink shading to rose and pink, suffused with saffron-yellow.

CRIMSON QUEEN—Strong, upright grower, flowers large and full. Color a rich, bright velvety crimson. A grand garden Rose, always in bloom.

DEAN HOLE (Alex. Dickson, 1904)—An intense salmon-pink with bud of extraordinary length. An English gold medal Rose.

DOUBLE PINK KILLARNEY (Scott, 1910)—The Killarney that will supersede the Killarney now grown. We have confidence in recommending this variety as a distinct improvement on the normal type, as it possesses from ten to twelve more petals than its parent. Awarded certificate of merit by the American Rose Society.

DOUBLE WHITE KILLARNEY (Budlong, 1912)—A pure white sport from White Killarney. A great forcing Rose.

DUCHESS OF ALBANY (W. Paul, 1888)—A deep-colored La France; flowers large and globular; a first-class Rose.

DUCHESS OF WELLINGTON (Alex. Dickson, 1909)—Intense saffron-yellow, stained with rich crimson.

ECARLATE (Boyttard, 1907)—Ecarlate is without question the finest red bedding Rose to date, and the longer you put off making its acquaintance the more you will miss.

EDWARD MAWLEY (McGredy & Son, 1911)—We have no hesitancy in saying that it is the finest of all dark Roses.

ETOILE DE FRANCE (Pernet Ducher, 1905)—Color a lovely shade of clear, red-crimson velvet; very fragrant.

FLORENCE FORRESTER (McGredy, 1914)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white, the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, National Rose Society.

FLORENCE PEMBERTON (Alex. Dickson, 1903)—Creamy-white, suffused pink; large, full, perfect in form.

F. R. PATZER (Alex. Dickson, 1909)—The color is creamy-buff, back of petals delicate warm pink.

FRANCIS SCOTT KEY (Cook, 1914)—An American seedling, raised by John Cook. It is a heavy double Rose of great substance. In color, red. It shows good growing characteristics and is undoubtedly a valuable variety. Throughout the summer this Rose was unequaled as a cut Rose, and it is proving equally good in mid-winter to be an excellent grower, opening perfectly and worthy of unqualified recommendation.

GENERAL McARTHUR (Hill, 1905)—The shape is fine; color brilliant scarlet.

GEN. SUPERIOR ARNOLD JANSSEN (Leenders, 1912)—Deep glowing carmine, carried erect on stiff robust stems. Very free.

GLADYS HOLLAND (McGredy, 1918)—Of magnificent form and size. Color buff, shaded orange-yellow, outside of petals pearly-peach. Very free flowering. Awarded a gold medal, National Rose Society of England.

GLOIRE DES BELGES (Chambard, 1916)—Growth vigorous and free, flowering continuously until late in the season. Buds oval, long and of elegant form with vivid colors of carmine and cochineal. Fine for massing and a fine cut flower.

GOLDEN SPRAY (Hugh Dickson, 1918)—Unique in habit and growth, it sending up long arching shoots which form great loose elegant sprays, every bud of which opens up in succession. The buds are very long, of deep Marechal Neil yellow, opening to almost single blooms of clear lemon-yellow. Awarded gold medal, National Rose Society of England.

GORGEOUS (Hugh Dickson, 1915)—Flowers large and full, exquisitely formed and produced in endless profusion. Deep orange-yellow and heavily veined with reddish-copper, the most charming and gorgeous coloring which has yet been introduced. The most striking Rose in existence. Gold medal, N. R. S.

HADLEY (Montgomery Co., 1914)—Hadley is a development from a line of seedlings raised by Alex. Montgomery, Jr., the varieties used in this development being Liberty, General McArthur and Richmond. In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well-formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-year-round forcing variety.

HELEN GOULD or BALDWIN (Lambert, 1898)—This is a grand Rose of the very highest merit for the garden; bright watermelon-red; very free grower and bloomer.

HENRIETTE (H. T.)—One of the finest in existence for bedding, garden and cut-flower purposes; blooms erect on long stems; buds long and pointed. Color fiery orange-crimson, changing to soft coral-salmon. Very hardy. Free in habit.

HERZOGIN MARIE ANTOINETTE (H. T.)—Very long buds of pure orange or old gold. Very large flower of perfect form. Soupert & Notting, of the Grand Duchy of Luxembourg, say: "This is the finest yellow of all the yellow Roses." Gold medal, M. Gladbach; certificate of merit of the German Nurserymen's Society; also prizes of honor at Leipsic, Sangerhausen and Zweibrücken.

HYBRID TEA ROSES, Standard Varieties—Continued

JONKHEER J. L. MOCK (Leenders, 1910)—The blooms are of largest size, highly perfumed. Color clear imperial-pink. Awarded two gold medals.

KAISERIN AUGUSTA VICTORIA (Lambert & Reiter, 1891)—Pure white, with shadings of primrose-yellow.

KILLARNEY (Alex. Dickson, 1898)—The finest pink forcing Rose ever introduced. In coloring it is especially beautiful.

KILLARNEY BRILLIANT (H. T.)—The introducers are to be congratulated 16 years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra.

LADY ASHTOWN (Alex. Dickson, 1905)—Deep rose, shading to silvery-pink, with touches of yellow at base of the petals.

LADY BATTERSEA (W. Paul, 1901)—The buds are full and pointed and of a beautiful cherry-crimson, permeated with an orange shade.

LADY URSULA (Alex. Dickson, 1908)—Color a most beautiful shade of flesh-pink, of great substance and good form.

LA DETROIT (Hopp, 1905)—Shell-pink, shading to soft rose. A beauty.

LA FRANCE (Guillot, 1867)—The Queen of all the Roses. Beautiful bright silvery-pink with pale lilac shading.

LA TOSCA (Schwartz, 1900)—Soft pink, tinted with rosy-white and yellow; large and full; very free flowering.

LAURENT CARLE (Pernet Ducher, 1907)—Color brilliant velvety carmine. A very promising variety; another Rose it will certainly pay you to try. We know it has a future.

MABEL DREW (Alex. Dickson, 1911)—The color is deep cream on first opening, passing to intense canary-yellow.

MADAME ABEL CHATENAY (Pernet Ducher, 1895)—Carmine-rose, shaded salmon; long pointed bud.

MADAME CAROLINE TESTOUT (Pernet Ducher, 1890)—Clear bright satiny-pink; flowers very large and extremely showy.

MADAME JENNY GILLEMOT (Pernet Ducher, 1905)—Deep saffron-yellow, opening canary, with dark golden shadings.

MADAME JULES GROLEZ (Guillot, 1857)—Clear deep rose, shaded yellow at base; long pointed bud.

MADAME PAUL EULER (Guillot, 1908)—Out in California and the Pacific Coast this Rose is so well thought of that it has been rechristened "Prima Donna." The color is a lovely shade of vermilion-pink, changing to silvery-pink.

MADAME MARCEL DELANEY (Leenders, 1916)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkeer J. L. Mock, and honored with the award of the Gold Medal of the Magatelle Gardens at Paris, 1915. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous.

MADAME SEGOND WEBER (Soupert & Notting, 1908)—Rosy-salmon or flesh-pink. Awarded two gold medals.

MADAMOISELLE HELENE CAMBIER (Pernet Ducher, 1893)—Grand flower, opens orange-yellow, changing to yellow.

METEOR (Geschwindt, 1887)—Dark velvety crimson, shaded maroon. A grand garden Rose.

MISS CYNTHIA FORD (Hugh Dickson, 1909)—In color it is a deep, brilliant, rose-pink, very large, perfectly formed.

MISS WILMOT (McGredy, 1917)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. The color is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect

and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S.

MRS. AARON WARD (Pernet Ducher, 1907)—Coppery-orange in the open bud, golden-orange when partly developed, pinkish-fawn of lovely shade when fully open, when it looks like a full, fluffy-silk rosette. Color effect of the whole flower is Indian-yellow. No wonder everybody who sees it falls in love with it.

MRS. ARTHUR ROBERT WADDELL (Pernet Ducher, 1908)—Rosy-scarlet buds opening red-dish-salmon, reverse of petals rosy-scarlet; semi-double flowers. A good decorative variety.

MRS. CHARLES BELL (Pierson, 1918)—This new Rose will appeal to those who grow Roses out of doors. It may be described as a shell-pink Radiance, and is a sport of that well known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Chas. Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

MRS. CHARLES RUSSELL (Montgomery, 1912)—No other forcing Rose except "American Beauty" can compete with it when it comes to counting points. Stems three feet long, stiff and surmounted by grand, rosy-pink blooms of largest size and build.

MRS. HENRY WINNETT (Dunlap, 1918)—This is a seedling raised by John H. Dunlap, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail storeman and his patrons. The finest of all red or crimson varieties. Buds are long and well formed. A superb red Rose.

MRS. MACKELLAR (Alex. Dickson, 1915)—The glorious blooms make this an imposing Rose. A deep citron or delicate pure canary color. As the large blooms gracefully expand the guard petals charmingly reflex and become pearly primrose-white of great decorative beauty. Award of merit (unanimous), R. H. S., London.

MY MARYLAND (Cook, 1909)—Color, growing intense pink, which lightens up beautifully as the flower expands.

NATIONAL EMBLEM (McGredy, 1915)—Dark crimson of perfect shape, habit and inflorescence; as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty, flowering freely and continuously.

OPELIA (W. Paul, 1912)—Salmon-flesh shaded with rose, large, and of perfect shape; of excellent habit, the flowers standing up well on long, stiff stems and produced in great profusion. Excellent for forcing and a fine decorative variety. Growth vigorous. Certainly a glorious Rose. Be sure to have "Opelia" fixed in your memory.

PRESIDENT TAFT (McCullough, 1908)—It is without question the most remarkable of all pink Roses. It has a shining, intense, deep pink color possessed by no other Rose.

RADIANCE (Cook, 1909)—A brilliant rosy-carmine, displaying beautiful rich and opaline-pink tints in the open flower.

RED RADIANCE (H. T.)—All who know that grand Rose Radiance will welcome this red form of that great favorite. Radiance is a Rose that does well everywhere; a fine grower and free bloomer, and no prettier pink Rose grown. Red Radiance is its exact counterpart except that the color is a rich deep red.

RED LETTER DAY (Alex. Dickson, 1914)—An exceedingly beautiful Rose of infinite grace and charm. Its velvety, brilliant, glowing scarlet-crimson buds and fully opened cactus-like flowers never fade, as the reflex of the petals is satiny crimson-scarlet. Awarded S. G. medal, N. R. S.

RHEA REID (Hill, 1908)—Flower large and double; rich dark velvety red; a good red garden Rose.

RICHMOND (Hill, 1905)—Pure rich scarlet; very free and continuous flowering; splendid forcer.

ROSE MARIE (Dorner, 1918)—This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright watermelon-red. Very desirable.

HYBRID TEA ROSES, Standard Varieties—Concluded

SUNBURST (Pernet Ducher, 1912)—This magnificent giant yellow Rose is a fine forcer; it stands head and shoulders above all others of its color, and will rank with American Beauty and the Killarneys in value and grandeur. The color is orange-copper or golden-orange and golden-yellow; edge of petals lighter; all intense shades, extremely brilliant in effect. Some call the color cadmium-yellow. It is the yellowest of all Roses in the everblooming class.

SOUVENIR DE PRESIDENT CARNOT (Pernet Ducher, 1895)—Delicate flesh shaded to white; extra fine Rose.

TIPPERARY (McGredy, 1917)—In color stands between Lady Hillingdon and Melody, showing an attractive shade of soft golden-yellow in the bud and half developed flower. Its freedom of flowering and its habit of growth will make it one of the most desirable Roses of its color.

ULRICH BRUNNER (Levet, 1881)—Cherry-red, of immense size, fine form and most effective in the garden.

VISCOUSNESS FOLKESTONE (Bennett, 1886)—There is no Rose of any class that beats this superb variety. The color is a white suffused with fawn. A most wonderful Rose.

WELLESLEY (Waban Conservatories, 1905)—The color is a beautiful shade of pink, the outside of

the petals being very bright in color, with silvery reverse.

W. C. GAUNT (Alex. Dickson, 1916)—Of medium size, with pointed buds, with naturally reflexed guard petals of brilliant velvety vermillion, tipped scarlet. Stems rigid, habit branching, large oval beech-green foliage. Rich tea fragrance; very rich in color.

WHITE KILLARNEY (Waban Rose Company, 1909)—Benches of it during the winter give the appearance of a bank of snow. It is pure white in color, long in bud, of fine form.

WHITE LA FRANCE, or AUGUSTINE GUINOIS-SEAU (Guinoisseau, 1889)—Beautiful light fawn color, almost white; rightly described as an almost white La France. Extra fine.

WILLIAM SHEAN (Alex. Dickson, 1906)—Purest pink, petals shell-shaped, four to five inches long; flowers of immense size and substance and of perfect form; free blooming and distinct. Gold medal, N. R. S.

WINNIE DAVIS (Nanz, 1902)—A most beautiful Rose. Apricot-pink with tints of the Aurora Borealis. Superb.

YVONNE VACHEROT (Soupert & Notting, 1905)—Color porcelain-white, strongly marked with pure pink; long pointed buds. Awarded the gold medal at Liege.

TEA-SCENTED ROSES New Varieties and a Few that are Scarce

The original blush Tea Scented Rose. A variation of the China Rose; was imported from China in 1810. In combination with the Yellow China, or Tea Rose introduced in 1824, it has been the origin of all the splendid varieties we now possess. Tea Roses are distinguished from others by the delightful fragrance of the flowers and by the delicate shades of yellow, nankeen, salmon, copper, wanting in Hybrid Perpetuals. They bloom in great profusion during the entire summer and autumn, being especially fine during the autumn months. These are ever-bloomers; half hardy.

LADY PLYMOUTH (Alex. Dickson, 1914)—A most distinct and meritorious Rose of the "Souvenir de Pierre Notting" type, whose delicate pearly but deep ivory-cream petals are very faintly flushed, giving it a most piquant finish that is difficult to describe. It is delicately pure tea perfumed. Awarded gold medal, N. R. S., and silver medal, Crystal Palace, London.

MRS. CAMPBELL HALL (Alex. Dickson, 1914)—Delicate creamy-buff, edged or suffused rosy-carmine. The center of the bloom is warm cerise

coral fawn. Deliciously fragrant. Awarded gold medal, N. R. S.

MRS. CURNOCK SAWDAY (H. T.)—A vigorous grower, with bright green foliage. The well shaped blooms carried erect on long stems, are sweetly scented. The color is a pleasing shade of pale blush-pink, a good garden Rose in commerce.

MRS. DUNLOP BEST—Deep yellow, approaching ochre; free in growth and bloom.

TEA-SCENTED ROSES, Standard Varieties

ALEXANDER HILL GRAY (Alex. Dickson, 1911)—Its color is a solid deep yellow throughout. Gold medal, N. R. S.

BLUMENSCHMIDT (Schmidt, 1907)—Pure citron-yellow; outer petals edged tender rose. Winner of three first premiums.

BON SILENE (Hardy, 1835)—Color crimson-rose with sheen of silver. This is one of the old forcing Roses that has come into favor again.

BOURBON ROSES, Standard Varieties

A semi-double rose-colored variety; was imported from Mauritius to France in 1819 by M. Jacques. Attempts were made to improve this pretty but imperfect Rose, and a number of very beautiful varieties have been originated. They are more hardy than the Tea Scented Roses.

EMPRESS EUGENIE (Plantier, 1855)—(Bourbon.) This magnificent Rose stands head and shoulders above all other sorts of its color. By all means try this for a garden Rose. A grand garden Rose. Solid color, of bright pink; very double, full and sweet.

EUGENE E. MARLITT (Geschwindt, 1900)—This Rose is sailing under the name of "Madame Eugene Marlitt." It is a grand garden Rose, none better; being exceptionally healthy, vigorous and free-blooming. The flowers are large; very dou-

ble; of a rich bright carmine with scarlet tones which do not fade in the hottest weather. It is quite hardy and fragrant.

SOUVENIR DE LA MALMAISON (Beluze, 1843)—Blush-white, shaded flesh; large and very double; sweetly scented. Especially good.

WHITE MALMAISON (Crown Princess Victoria)—White, tinted with lemon; resembles the old Souv. de la Malmaison, except color. It is a Rose that stands up well to the head of the procession. Extra.

CHINA ROSES, Standard Varieties

Named by some Bengal Roses; natives of China. Introduced into our gardens in 1920. They are of luxuriant growth, and are so constantly in flower during summer and autumn, and give so little trouble. These Roses are so fine for bedding and massing for color effect that they ought to be cultivated in preference to many annuals. They are hardier than the Tea Roses.

ARCHDUKE CHARLES (Laffay)—Opens red, changing to silvery-pink.

BURBANK (Burbank, 1900)—Color cherry-rose; by many highly prized as a fine bedder, as it blooms very freely.

ETINCELANTE (C.)—Bright brilliant red, large, full and of fine form, opening into an enormous

bouquet of fragrance; bud elongated, of brilliant velvety-crimson color. Free flowering. Extra fine.

CLIMBING LADY ASHTOWN—This is a wonderful Rose in many ways, producing not only an immense crop of its very large soft rose-colored

flowers in June, but continuing to bloom almost without intermission until the end of the season. A royal Rose; cannot be too highly recommended.

CLIMBING MAMAN COCHET—No Rose we grow is so popular as Maman Cochet. Here we have an exact counterpart of that popular variety, except that it is a vigorous climber. All will welcome this new Rose.

TENDER CLIMBING ROSES, Standard Varieties

CLIMBING HELEN GOULD (Good & Reese, 1912)—(C. H. T.) Probably no red Rose has held its place secure in the hearts of Rose lovers for so long a period as has the beautiful Helen Gould. We have now the pleasure of introducing this famous Rose in climbing form. Everybody is familiar with the warm watermelon-red color of its charming flowers. This is a grand climber. Be sure and try it.

GAINSBOROUGH (Good & Reese, 1903.)—(C. H. T.) A climbing form of Viscountess Folkestone. Its delicate coloring is difficult to describe, being elegantly tinged fawn, almost white and lustrous as satin. When in full bloom it resembles a large, fine fluffy Peony, but without a suggestion of stiffness, often measuring eight to nine inches in diameter. An enthusiastic admirer from the state of Oregon describes it as a Rose reminding him of a beautiful girl wearing a light colored Gainsborough hat, ornamented with white ostrich plumes, hence the suggestion of its name.

JAMES SPRUNT (Sprunt, 1858)—(C. C.) Deep cherry-red, very double and hardy.

LAMARQUE (Marechal, 1830)—(N.) White shaded lemon; very sweet scented; an excellent variety.

PILLAR OF GOLD, or E. VEYRAT HERMANOS (Bernaux, 1895)—(C. T.) The blooms are double to the center, of the largest size, and come in immense bouquets of from five to ten blooms on a single branch, and the effect throughout the blooming season is a perfect sheet of color. The color, ruby-red suffused with golden-yellow, is a happy combination.

POLYANTHA OR BABY RAMBLER ROSES

Standard Varieties, Including Hybrid Polyanthas. They are Hardy.

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through the summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay, and anyone who attempts to handle Roses without including this class will bump into something real hard. They are useful, either pot grown or for bedding purposes or for hedge effects. Completely hide the plant with bloom from early till late.

ANNA MULLER (Schmidt, 1907)—This Rose is very much the same as the Crimson Baby Rambler, except in the colors of its flowers, which are a shiny, brilliant pink.

BABY RAMBLER, or MADAME N. LEVAVASSEUR (Levavasseur, 1903)—This is the original Baby Rambler, daddy of them all. In bloom all the time. Flowers in large clusters of brightest crimson.

POLYANTHA OR BABY RAMBLER ROSES—Concluded

BABY TAUSENDSCHOEN (Welter, 1911)—Its flowers are large and so much like "Tausendschoen." A bush form of "Climbing Tausendschoen" or "Thousand Beauties," having all the charms in the variable coloring in its flowers that its parent has.

CATHERINE ZEIMET, or WHITE BABY RAMBLER (Lambert, 1901)—Grows to a height of twenty inches and produces double pure white flowers in abundance.

CLOTHILDE SOUPERT (Soupert & Notting, 1890)—(H. Poly.) Known the world over as one of the very best of all bedding Roses. The only rival of "Hermosa" as a bedder and market pot plant. The color effect is beautiful ivory-white, shading towards the center to bright silvery-pink. Everybody's Rose.

ELLEN POULSON (Poulson, 1912)—Dark brilliant pink, large, full, sweetly scented. Most floriferous.

ERNA TESCHENDORFF (Teschendorff, 1911)—The flowers are of a deep crimson color, flushed with carmine, resembling the dazzling color of "Gruss an Teplitz." It is much sought after in America to bloom in pots during winter and for Easter time.

JESSIE (Merryweather, 1909)—The flowers, which are produced in huge clusters, are of a bright cherry-crimson color which does not fade.

LE PONCEAU (Hemeray-Aubert, 1910)—Dark red, blooms in large clusters. A choice variety.

MAD. JULES GOUCHALT (Turbat, 1913) (D. P.)—Buds bright vermilion-red, shaded clear orange-red; flowers same, passing to a bright, fiery rose which does not fade. Wood and foliage clear

green, producing long, erect panicles of twenty-five to fifty perfectly formed blooms of good keeping qualities. Award of Merit and Silver Gilt Medal, R. H. S., and Gold Medal, Paris.

MADMOISELLE CECILE BRUNNER (Ducher, 1880)—(H. Poly.) This is the popular Baby Pink or "Sweetheart" Rose. In the past year or two this Rose has fairly jumped into popularity. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds. Color blush, shaded light salmon-pink; distinct and desirable.

MRS. WILLIAM H. CUTBUSH (Levavasseeur, 1907)—It produces in constant profusion throughout the entire summer its pleasing delicate pink blooms in large trusses.

ORLEANS (Levavasseeur, 1910)—Showiest and prettiest of all Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, and cannot be beaten. The color is irresistible. Plant grows like a weed and flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe, by storm and has made a sensation. Awarded gold medal.

PERLE d'OR (Debreuil, 1883)—Nankeen-yellow with orange center; novel and beautiful. This Rose is dividing honors with "Mlle. Cecile Brunner" as a cut flower, being planted largely for this purpose.

POLYANTHA OR BABY RAMBLER ROSES, Newer Varieties

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom.

BABY ECHO—A greatly improved Tausendschoen; about the same color, but with more substance.

EDITH CAVELL—Bright crimson; white eye; very beautiful.

ETOILE LUISANTE OR BABY HERRIOT—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner"), colored up like the Daily Mail Rose ("Mme. Edouard Herriot"), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which on account of the similarity in color has been known among the cut flower trade as Baby Herriot. Its color is a shrimp-pink with intense coppery-yellow suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. Plant is of free growth and floriferous. We are certain that Baby Herriot will please everyone.

GRUSS AN AUCHEN (Geduldig, 1909) (H. Poly.)—Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

GEORGE ELGER (Turbat & Co., 1913)—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all of its class, it is free in growth, free in bloom with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

Mlle. FRANCISQUE FAVRE—Dwarf Polyantha. Robust in growth, quite continuous in bloom, flowering in large trusses of single flowers. Color, velvety crimson, with large silver-white eye. Extremely showy.

PHYLLIS (P.)—Pretty, bright carmine-pink, very bushy and of branching habit, producing long, feathery panicles of flowers from June until frost. A novel rose, ideal for bedding, massing and decorative in pots.

TIP TOP, "Baby Doll" (Lambert, 1915)—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll-roses, a bench of "Baby Doll" being an even parterre of delicious color.

A bed of Edith Cavell, "The New Polyantha."

HYBRID PERPETUAL ROSES—Newer Varieties

The first Hybrid Perpetuals were grown from crosses between Hybrid China and Tea Scented Roses with Gallica and Bourbon Roses. This is a beautiful class and cannot be too highly recommended, including, as it does, many of the hardiest early and late flowering kinds and nearly all of the superb rich crimson, red and pink varieties which make such pleasing contrasts to the yellow and white Teas. These are hardy.

GEORGE AHRENDTS, or PINK AMERICAN BEAUTY (Hinner, 1910)—This is the wonderful "Pink American Beauty." This Rose we predict will have as large a following and be as largely planted in a very few years as the now famous "White American Beauty." We have looked it over in the field and grown it in pots for the market, and we absolutely cannot detect a single fault in it or about it. The growth and make-up of the plants is superb, while the delicate pink color is unapproachable. Thank you, Mr. Hinner. You have enriched our Rose collection for all time. You know what some of you have missed

by delaying so long in getting acquainted with "White American Beauty." Do not repeat this mistake with "George Ahrends."

GEORGE DICKSON (Alex. Dickson, 1912)—As near as we can describe it, the color is a velvety black-crimson, the back of the petal being heavily veined with deep pure crimson-maroon. We have regularly had blooms of the highest exhibition standard quite five inches across. It has wonderful lasting qualities, not only as to the retention of its color, but also in its shape and freshness. Awarded the gold medal of the National Rose Society of England, besides many other first awards at various other shows in England and Ireland.

It is an extraordinarily strong grower, and has the vigor and hardness of an oak. Its magnificent flowers are nothing less than glorious—immense in size and produced with great freedom. The color is a marvelous white, without a tinge of yellow or any other shade. A true paper-white, the standard by which all white Roses are judged. We grow "White American Beauty" literally by hundreds of thousands.

NOVA ZEMBLA—The pure white Conrad F. Meyer.

PRINCE CAMILLE DE ROHAN (E. Verdier, 1861)—Deep velvety crimson-maroon, full and of good form and perhaps the best of all the hardy dark Roses.

HARDY CLIMBING ROSES, Newer Varieties

and a few that are scarce, including the Ramblers, Cl. Polyanthas, Wichuraiana, Multifloras, Hybrid Noisettes, Climbing Chinas, Climbing Bourbons.

These Roses are suitable for planting where they can climb on walls, fences, galleries, porches, pillars, pergolas, arches, etc.; in fact, wherever a hardy climber is required. This list includes the Ramblers, Climbing Polyanthas, Wichuraianas, etc.

ALIDA LOVETT—Both buds and flowers are large; are of ideal form, are held on stiff stems a foot and a half to two feet long and the color is a lively bright shell-pink with shadings of rich sulphur at the base of petals—a combination that is both novel and beautiful. The flowers are of remarkable substance and long-lived, whether cut or left to remain upon the plant, and are pleasantly perfumed. It is very much brighter than those of the justly popular Dr. Van Fleet Rose.

AMERICAN PILLAR (Conard, 1909)—(C. P.) A single flowering variety of great beauty, which ap-

peals to everyone. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and clusters of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten. They last in perfection a long time and are followed by brilliant red hips or berries, which are carried late into the winter; and as the plant frequently retains its lovely green foliage until the end of November, it forms a beautiful decorative subject throughout the autumn. A great Rose to grow in pots for Easter.

HARDY CLIMBING ROSES, Never Varieties—Concluded

BESS LOVETT—Resembles Climbing American Beauty in shape of bloom, but is very much brighter in color and much more fragrant. The flowers are clear bright red, of good size, and of double, full, cupped form, lasting a long time in good condition. Beautiful in bud and bloom and the most fragrant of the Climbing Roses. A vigorous grower and free bloomer. The large glossy foliage, like that of Silver Moon, greatly enhances the beauty of the flowers.

CLIMBING AMERICAN BEAUTY (Hoopes Brothers & Thomas, 1911)—(H. N.) A seedling from American Beauty with Wichuraiana and Tea blood in its veins. The introducers say of it: "Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection." This Rose has already made its mark and wherever it has been planted it has pleased until today we sell it by the tens of thousands. You lose if you are slow to take hold of the "Climbing American Beauty." It grows and blooms.

CHRISTINE WRIGHT (Hoopes Bros. & Thomas, 1913)—(W.) A most exquisite new Rose, a cross between Caroline Testout and an unnamed seedling; it is of strong climbing habit, with large, heavy, dark green foliage, which is immune to disease. The flowers are double, from three and one-half to four inches in diameter, borne singly and in clusters, of perfect form, beautiful in the bud and in the fully expanded flower; in color a most refreshing bright wild-rose pink; it flowers profusely during June and continues more or less throughout the season.

PINK TAUSENDSCHOEN (Rosarie)—This is a bright pink form of Tausendschoen. A grand Rose from any standpoint.

SHOWER OF GOLD (Paul & Son 1910)—(W.) The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON (Henderson, 1910)—(W.) Flowers very large four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

CLIMBING BABY RAMBLER, or MISS G. MESSMAN (Messman, 1911)—(C. P.) Everyone knows how Baby Rambler is always in bloom. This is simply a climbing form of Baby Rambler, embracing all its good qualities.

CRIMSON RAMBLER (Turner, 1893)—(C. P.) Bright crimson flowers produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches; also makes a fine attractive hedge. Awarded gold medal N. R. S. A Rose for the masses.

LADY GAY (Walsh, 1903)—(W.) Flowers of a deep cherry pink, shading on the edge of the petals to a very delicate soft tone of pink.

MADAME ALFRED CARRIERE (Schwartz, 1879)—(H. N.) Pure white, suffused with yellow at base of petals; very free and very fragrant; fine for arches and pillars. In Oregon it grows to the roofs of two-story houses, covering the entire side or end of a large-sized house, and simply a wilderness of blooms.

MARY WASHINGTON (Origin unknown)—(Mtf.) Pure white, perfectly double, in immense clusters; fine.

PAUL'S CARMINE PILLAR—Very early. The flowers are large and very showy, of a rich rosy-carmine with white eye.

PHILADELPHIA RAMBLER (Conard, 1902)—(C. P.) Glowing crimson; large clusters; fine.

PRAIRIE QUEEN (Feast, 1843)—(S.) The old standby red climber. It is so hardy that it delights in the climate of Alaska and Canada.

RED DOROTHY PERKINS, or EXCELSA (Walsh, 1909)—(W.) It is a good deal to claim for a Rose, but we are within bounds when we describe Excelsa as a brilliant Crimson Rambler flower on glossy, varnished Wichuraiana foliage. The defects of Crimson Rambler are its unsightly foliage in unseasonable weather and its detestation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen; and this will assure this lovely crimson-scarlet pillar Rose a place in every American

garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers.

DOROTHY PERKINS (Perkins, 1902)—(W.) A most beautiful deep pink; the flowers are borne in large clusters of small double blooms and are very sweetly scented; quite first class. Another Rose for the masses.

EXCELSA—See Red Dorothy Perkins.

EMPRESS OF CHINA (Jackson, 1896)—(C. B.) Bright pink; in large clusters.

FLOWER OF FAIRFIELD (Ludorf, 1908)—(C. P.) A counterpart of Crimson Rambler in every respect, except that it shows ever-blooming tendencies, many new growths being terminated with a large cluster of flowers.

FORTUNE'S DOUBLE YELLOW, or BEAUTY OF GLAZENWOOD (Fortune, 1845)—(H. N.) Yellow, flaked with carmine. This is a great Rose in California where it is seen at its best although suited for general planting.

GARDENIA (Souper & Notting 1900)—(W.) Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

HIAWATHA (Walsh, 1905)—(W.) Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color it is brilliant ruby-carmine, with a clear white eye and a mass of golden stamens.

TAUSENDSCHOEN, or THOUSAND BEAUTIES (Schwartz, 1906)—(C. P.) The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white, delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring; will become as famous as Crimson Rambler or Dorothy Perkins.

VEILCHENBLAU, THE BLUE ROSE (Schmidt, 1909)—(C. P.) This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

HARDY CLIMBING ROSES, Standard Varieties—Concluded

WHITE DOROTHY PERKINS (B. R. Cant. 1908)—(W.) It has been the cry of nurserymen for years for a white climber that would rank up with Crimson Rambler, and now we have the pleasure of offering this White Dorothy Perkins, that in every way is the equal, if not superior, to Crim-

son Rambler, as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.
YELLOW RAMBLER, or AGLAIA (Lambert, 1896)—(C. P.) Bright yellow changing to canary-yellow; produced in pyramidal clusters of fifty or more blooms.

MOSS ROSES

These are probably a sport of the Cabbage Rose. The origin of the double Moss Rose is left to conjecture. They have always been favorites, for what can be more elegant than the bud of the Moss Rose and more delicious than its fragrance. Perfectly hardy.

ELIZABETH ROWE (Rowe, 1866)—This is an old favorite with its large deep pink buds well mossed. A beauty.

HENRI MARTIN (Portner, 1863)—Large, full flower of deep red; well mossed; fragrant.

MOUSELINE (Robert and Moreau, 1881)—Pure white flower, buds heavily and beautifully mossed.

PRINCESS ADELAIDE (Laffay, 1845)—Deep bluish-pink with buds that are thoroughly mossed.

MISCELLANEOUS ROSES

Under this heading are listed all the Roses not embraced in the different families or types that have name in the preceding pages.

AMOENA, The Pink Flowering Cherokee Rose (Hockbridge, 1909).—(L.) The flowers are the same as the White Flowering Cherokee, except that the color is a glowing pink with a golden-yellow center. Resembles huge apple blossoms.

ARTHUR R. GOODWIN (Pernet Ducher, 1909).—(A. B.) This is a genuine "Pernetiana," and is perfectly hardy everywhere. The color is coppery orange-red, passing to salmon-pink as the flowers expand. A superb combination of color.

LAEVIGATA, The Single White Cherokee Rose (Lindley, 1820).—(L.) This is the famous Cherokee Rose so well known in California. Large, pure white flowers with center filled with golden-yellow anthers.

LOS ANGELES (A. B.)—Howard and Smith, 1917.—Originators' description: "Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Niel. The buds are long and pointed and expand into a flower of mammoth proportions, while the beauty of form and ever increasing wealth of color is maintained from the incipient bud until the last petal drops."

MADAME EDWARD HERRIOTT (Pernet Ducher) (A. B.) "The Daily Mail Rose." Winner of the gold cup which was offered by the London Daily Mail, for the best new Rose, exhibited at the International Horticultural Exhibition, held in London, England, May, 1912, and to be known as the Daily Mail Rose. In competition with the world's greatest rosarians this much coveted prize was awarded to M. Pernet Ducher for this wonderful novelty. It was again exhibited in London on May 1, 1913, at the exhibition of the National Rose Society of England, where it was awarded the Society's gold medal. M. Pernet Ducher describes its color as follows: "Buds, coral-red, shaded with yellow at the base, the open flowers of medium size, semi-double, of a superb coral-red, shaded with yellow, and bright rosy-scarlet, passing to shrimp-red. A wonderful Rose. The bud is long, slender and pointed, the color is like sunshine on a copper-red metal."

MISS LOLITA ARMOUR (A. B.)—Bud medium size, globular; flowers very large, cupped, double borne, several together, on long stems; very lasting; strong fragrance. Color, chrome-yellow at

base, shading to burnt orange and copper; reverse of petals chrome-yellow at base, shading to bright salmon with brilliant copper suffusion; passes to lovely shade of shrimp-pink and copper with age. Foliage abundant, leathery, glossy bronze-green, large. Growth very vigorous, bushy upright; abundant bloomer. Silver medal, N. R. S., 1919.

NEW CENTURY (Conard, 1891).—(R.) A grand Rose this is entirely hardy, bearing beautiful silvery-pink flowers in clusters. This Rose is in bloom all the time.

SIR THOMAS LIPTON (Conard, 1905).—(R.) The best pure white Rugosa Rose. Strong and vigorous; grows four feet high. Flowers perfectly double, pure snow-white. Fragrant.

WHITE BANKSIA, or Lady Banks (Keer, 1807).—(L. B.) A vigorous grower, in California growing to the top of tall trees and completely enveloping the entire tree; small double, pure white flowers in clusters, with true violet fragrance. Indeed, if one were blindfolded, he could not detect the odor from Violets. Very desirable.

WICHURIANA, or MEMORIAL ROSE (Dr. Wichura, of Japan, 1886).—(W.) It is difficult to conceive anything more appropriate, beautiful and enduring for covering graves and plots in cemeteries than the Hardy Memorial Rose. It creeps along the ground as closely as an Ivy. The flowers are produced in lavish profusion in July. They are single, pure white, with a golden-yellow disc, five to six inches in circumference. It is also immensely valuable as a Climbing Rose, covering arches, fences, etc.

WILLIAM F. DREER (A. B.)—A beautiful Rose of the same parentage as Los Angeles, and which for delicacy of coloring, is incomparable with any other variety, it reminding one of the delicate tints of some varieties of water lilies. The flowers, which are similar in shape to Los Angeles, and like that variety, beautiful in all stages of development, are at their best in the half-expanded flower. These, in expanding, are of a delicate, silvery-shell-pink. The base of the petals are of a rich golden-yellow, which at certain stages of development, gives a golden suffusion to the entire flower, this golden suffusion being particularly brilliant early and late in the season.

YELLOW BANKSIA, or LADY BANKS (Damper, 1827).—(L. B.) Same as White Banksia, except color of bloom is sulphur-yellow. Has the same delicious Violet fragrance.

We Are Headquarters For GLADIOLI

Good & Reese Co.'s Gladioli

are fast becoming famous, and justly so, as there are no better bulbs grown than we offer. Florists will find our bulbs big and fat—just the kind to produce plenty of flowers.

Force Gladioli Make every inch in your greenhouse count. There is no better way than to plant a Gladiolus bulb in each vacant spot in your benches. They will do well between the Carnations. Plant early between "Mums;" they will be at a nice height when the crop is over. There is always some waste space in every greenhouse that can be made profitable by forcing Gladioli. Varieties that force are marked with an asterisk (*).

Sizes of Gladioli No. 1—One and one-half inches and up. No. 2—One and one-fourth to one and one-half inches. No. 3—One to one and one-fourth inches. Our supply will run up into the millions this year. Each order is filled in its turn, so you better order early if you are in the market.

BEAUTIFUL FERNS

Successful Fern growing always hinges on whether your Ferns are clean from the white fly. Our Ferns are absolutely clean. The other fellow's are sometimes not, which we know to our sorrow. Better get Good & Reese clean Ferns—always good, always grow.

New Fern, Nephrolepis Liberty

In the past we have sent out four Ferns that have all stood the test, viz., Roosevelt, Teddy Junior, Goodii or Baby's Breath, Splendid or Big Four. We

"Teddy Junior,"
the Wonderful New Fern.

Grand New Dwarf Fern, "Teddy Junior"

The Fern for Every Household

This is known to the trade as the greatest of all Nephrolepis. No Fern can equal it. See what a fine plant it makes. **Two and one-quarter inch pots, \$1.00 per dozen; \$6.50 per hundred; \$60.00 per thousand.**

Nephrolepis John Wanamaker

"The Wanamaker Boston Fern"

A "sport" from Nephrolepis Scholzei, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzei, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Nephrolepis. **Two and one-quarter inch pots, \$1.00 per dozen; \$6.50 per hundred; \$60.00 per thousand.**

"Big Four Fern."

now offer Liberty, feeling sure that it will become as famous as any of the quartet. Liberty has a cast of blue that submerges the green; the fronds are finely cut and the outstanding qualifications of this variety are the fact that each pinna is crested or split, giving it a decided unique appearance. We feel sure this Fern will make a place for itself. Our claims for this Fern have been verified the past fall in the great number of repeat orders sent us after seeing it. It is the biggest make of them all. **Two and one-quarter inch pots, doz., \$1.50; hundred, \$8.00.**

John Wanamaker Fern.

Fronds of the "Roosevelt Fern."

Nephrolepis "Roosevelt"

The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants, a far greater number than was ever sold of a new Fern. **Two and one-quarter inch pots, 90c per dozen; \$6.00 per hundred; \$55.00 per thousand.**

Nephrolepis Splendida

The Big Four Fern

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of the "Fish Tail." **Two and one-quarter inch pots, \$1.00 per dozen; \$6.50 per hundred; \$60.00 per thousand.**

Roosevelt Fern.

BEAUTIFUL FERNS Continued

Nephrolepis Whitmanii

The Ostrich Plume Fern

This is the well known fluffy leaved Fern; beautiful. Two and one-quarter inch pots, \$1.00 per dozen; \$6.50 per hundred; \$60.00 per thousand.

Nephrolepis Whitmanii Compacta

The Parlor Fern

This is a condensed form of the "Ostrich Plume Fern," with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description. Two and one-quarter inch pots, \$1.00 per dozen; \$6.50 per hundred; \$60.00 per thousand.

Nephrolepis Scholzeli

The Crested Fern

The fronds, like Scottii, stand erect, and with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow. Two and one-quarter-inch pots, \$1.00 per dozen; \$6.50 per hundred; \$60.00 per thousand.

Ostrich Plume Fern.

Nephrolepis Bostoniensis

The Boston Fern

A variety that needs no description. By many called the Fountain Fern, on account when grown into large plants it droops gracefully. Two and one-quarter inch pots, \$1.00 per dozen; \$6.50 per hundred; \$55.00 per thousand.

Nephrolepis Exaltata

The Old Original Sword Fern

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the Nephrolepis we offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. Two and one-quarter inch pots \$1.00 per dozen; \$6.50 per hundred; \$60.00 per thousand.

Boston Fern.

Newport Fern Scottii.

Nephrolepis Elegantissima

The Philadelphia Lace Fern.

This is a greatly improved Elegantissima, not running back nearly so much as the old form. Dozen \$1.00; hundred, \$6.50; thousand, \$60.00.

Nephrolepis Goodii

The Baby's Breath Fern

This Fern is Splendid to Use for Fern Dish Planting

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. Nothing is daintier or more exquisite than well-grown specimens of any size. Our reputation for it that no Fern in existence can com-

Nephrolepis Scottii

The Newport Fern

It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. Two and one-quarter inch pots, \$1.00 per dozen; \$6.50 per hundred; \$60.00 per thousand.

PTERIS WILSONII—The most beautiful and useful of all the crested sorts for pans or dishes.

PTERIS WIMSETTI—A beautiful, low-growing Fern, suitable for table dishes.

Pansy Geranium, Mrs. Loyal, A Wonderful Plant

This new and wonderful Pansy Geranium is of the easiest growth, dwarf in habit, and literally covered with flowers all the time; and as it requires little or no attention, it is invaluable as a window plant. The coloring and markings of the flowers are most extraordinary—light pink, white, dark purple, black, etc., almost rivaling the Pansy in uniqueness of flower. It is this combination of coloring which obtained for it its popular name of Pansy Geranium. Price, \$1.75 per dozen; \$12.00 per hundred.

To get best results Iris are planted in the fall, although they can be planted any time in the spring of the year.

LIBERTY IRIS, The "Fleur De Lis" of France

No other flower has so many combinations of color, especially of the delicate and unusual shades, and the name Rainbow Flower is most fitting. They are absolutely hardy, as beautiful in form, texture and coloring as any Orchid, and many are delightfully fragrant. They are not particular as to soil, will grow where anything will, but do better in well-drained locations. There is nothing prettier than this Liberty Iris, blooming from May 10th to June 10th. The colors are gorgeous and they completely hide the plant. Be sure and plant some Liberty Iris.

Newer Sorts of BEAUTIFUL CANNAS

CITY OF PORTLAND—Deep salmon-pink; very neat habit, particularly as a bedder when used with other plants; height, three and one-half feet. **Per dozen, \$1.25; per hundred, \$8.00.**

KING HUMBERT—Bronze foliage. Flowers as large as the Orchid-flowering Cannas. Six inches across, in trusses of gigantic size; of a brilliant orange-scarlet with bright red markings. Foliage is broad and massive, of a rich coppery-bronze; bold and effective. "King Humbert" is the one ideal Canna. **Per dozen, \$1.25; per hundred, \$8.00.**

MISS FLORENCE HALL (Queen of the Canna Caravan)—We can't describe it, but hope simply to hint at its queenly splendor. Foliage rich green, three and one-half feet, massive trusses of immense flowers, a constant bloomer, and its delicate harmony of colors do not fade in our hottest sun. This is a pink Canna, but unlike anything on the market today. Its blossoms are massive, but it is not its bigness that captivates you, it is its Color. A great peach orchard in full bloom with its rich pink, its warm flesh and glints of

gold only suggests the beginning of the color scheme in this new child of the Canna family. The outer portion of the immense bloom is a rich pink graduating to the center with splashes of warm flesh with just enough of gold flecked into the throat to please the most exacting eye. This Canna is the Marvel of Marvels. **Per dozen, \$6.00.**

PANAMA—An attractive rich orange-red, well-defined edge of bright golden-yellow. Flowers very large, and the immense spread of the individual blooms coupled with its early free flowering habit makes this Canna noteworthy. **Per dozen, \$1.25; per hundred, \$8.00.**

THE PRESIDENT—A rich, glowing scarlet; flower seven inches across when open; strong, erect stalks, well above the large, green foliage. The President is superior to any other red variety in the quantity and quality of bloom. From early summer till frost it is covered with its giant bloom and every visitor to our place the past season pronounced it "the best they had ever seen." **Price, dozen, \$1.25; hundred, \$8.00.**

STANDARD VARIETIES OF CANNAS

Price, per dozen, \$1.00; per hundred, \$6.50.

AUSTRIA—The yellow orchid flowered Canna; none better.

MEPHISTO—A brilliant deep, rich red; a wonderfully satisfying Canna.

METEOR—Immense trusses of large, rounded flowers, well displayed above the massive foliage; brilliant crimson. Flowers keep well and are self-cleaning.

ORANGE BEDDER—Rich orange scarlet; free bloomer.

RICHARD WALLACE—A light shade of canary-yellow, almost an ecru, with delicate flecks of red; a lovely Canna.

SECRETAIRE CHABANNE—(Green.) A distinct and pleasing salmon; a fine bedder. Three and one-half feet.

UNCLE SAM—The most stately of all Cannas; bears three or four enormous bunches of brilliant orange-scarlet flowers on each stalk. Received an award of merit from the Royal Horticultural Society of England. Six feet.

VENUS—Four feet. A gay rosy-pink, with a well-defined border of creamy-yellow.

WILLIAM BATES—A light canary-yellow; fine bloomer.

OUR GRAND GARDEN DAHLIAS

Are great for cut flowers. We sell divided field roots.

Cactus Dahlias

So-called from their resemblance to Cactus flowers. They are characterized by long, narrow, pointed tubular and twisted petals of graded lengths, giving the flowers a striking and attractive appearance. Grand for cut-flowers. **Price, per dozen, \$1.25; hundred, \$10.00.**

CHARLES CLAYTON—The strongest words of praise are not extravagant when applied to this wonderful new Cactus. It is the ideal in color, form, length of stem and general good habits, beyond which it would seem little could be hoped for. The color is a most intense crimson, so vivid as to dazzle the eye; superb.

COUNTESS OF LONSDALE—For perfection of bloom, erectness of stem, abundance of flower, this variety has never yet been equaled. On several of the plants we have counted over 150 perfect blooms on one plant. The color is a rich salmon-pink, tinted apricot.

FLORADORA—Deep dark, rich wine-crimson, splendid shaped flowers on long, upright, wiry stems.

J. H. JACKSON—This is without doubt the finest dark Cactus Dahlia. Its velvety black crimson-maroon shade is very striking. Large and perfect.

KALIF (Hybrid.)—A truly majestic flower, frequently measuring over nine inches in diameter. The flower is of perfect Hybrid Cactus form, and in color a beautiful pure glowing scarlet. The habit of the plant is all that can be desired, growing, with us, about four and one-half feet in height. The gigantic flowers, which are produced freely, are held erect on strong stems of wiry stiffness, making it a most effective and useful variety for cutting, as well as for garden decoration. "Kalif" is the first variety that has had the distinction of receiving the National German Dahlia Societies' highest award. This variety bears our highest recommendation.

KRIEMHILDE—A most popular cut flower variety. Color a brilliant pink shading to white in center.

PRINCE OF YELLOWS—One of the best canary-yellows for cutting.

QUEEN OF HEARTS—(New.) The best white Cactus ever introduced. Pure white shading to lemon-yellow at base of the petals; very free bloomer.

REINE CAYEAUX—Brilliant Geranium-red; early and free; a great favorite.

RUTH FORBES—(Hybrid.) The massive, clear pink flowers, composed of heavy petals, are often accompanied by stems measuring two feet in length; excel any other variety for large vase purposes.

SPRINGFIELD—A new Dahlia of our own introduction. It is identical with Countess of Lonsdale except in two essentials. It has a darker stem and the flowers instead of being a salmon-pink as in Lonsdale, in Springfield are a rich amaranthine-red. Its beauty cannot be described. No Dahlia blooms freer, no Dahlia is as pretty as Springfield. It last longer than any other Dahlia we know.

Century Dahlias

This is an entirely new race of Single Dahlias. We consider today that the new Century Dahlias occupy first place where beauty of coloring and artistic effect is desired. Owing to their immense size, long stems, graceful carriage, combined with their purity of color, or the blendings of colors, shades and tints, they entirely outclass all other Dahlias for cut flowers. Keep each variety when cut in a separate vase. **\$1.25 per dozen; \$10.00 per hundred.**

BIG CHIEF—Deep, rich velvety red shaded maroon.

FRINGED CENTURY—Intense rosy-crimson with lighter edges, fringed or cleft petals; blooms all summer; fine for cutting.

VARIEGATED LISZT CENTURY—This, next to Geisha, is the gayest of all Dahlias. Dark oriental red with yellow tips and markings. A superior variety.

Show and Fancy Dahlias

These are the old-fashioned Dahlias of our mothers' gardens. Perfect in shape and outline. **Per dozen, \$1.25; hundred, \$10.00.**

ARABELLA—Primrose-yellow, tipped and shaded old rose and lavender; very fine.

LUCY FAWCETT—Sulphur-yellow, striped and spotted carmine-rose.

QUEEN VICTORIA—Pure canary-yellow. One of the freest bloomers. Good for cutting.

ROBERT BROOMFIELD—Pure snow-white. Of large size. A very free bloomer. Grand for cut flowers. We recommend this variety.

W. W. RAWSON—(Show.) This popular novelty has been the admiration of all wherever shown the past season. The massive, perfect flowers, often measuring 6 inches across, are borne on stiff stems about 15 inches long. The entire flower is absolutely perfect in outline and formation. The color is pure white, overlaid with amethyst-blue.

Decorative Dahlias

Dahlia Delice.

These come next to the Cactus as a cut flower. They are also very showy in the garden, being unusually free bloomers. They are more formal in make-up than the Cactus Dahlias, but not so formal as the Show varieties, being a happy medium between the two. **Price, per dozen, \$1.25; per hundred, \$10.00.**

CUBAN GIANT—Flowers of great size, measuring six inches across. Color dark, glowing crimson, shaded maroon. Magnificent.

DELICE—Its beautiful soft yet lively color a glowing rose-pink, together with its shape, makes it one of the prettiest and most valuable of all Dahlias.

FRANK L. BASSETT—Color bright royal purple, shading to lavender-blue, and extremely early and profuse bloomer.

JACK ROSE—A magnificent flower with perfect form. Color a crimson-red with maroon shadings. Named for its counterpart among Roses, the famous "General Jack."

JEANNE CHARMET—A charming cut flower variety of a pleasing shade of delicate violet-rose on a lighter ground. A glorious flower.

OUR GRAND GARDEN DAHLIAS—Concluded

Decorative Dahlias—Concluded

JOHN WANAMAKER—This is the most beautiful of all Dahlias, having a formation entirely its own in its charming irregularity. The flowers are alike, and yet not exactly alike, one of its charms. Violet mauve or soft lavender. Awarded first prize as the best pink Dahlia, any class, by the American Dahlia Society at the New York exhibition. The plant is a strong, vigorous, branching grower and the earliest, most constant and profuse bloomer.

MADAME A. LUMIERE—Ground color white, suffused towards the ends of the petals with red, the tips pointed with bright violet-red.

MATCHLESS—Deep crimson, of large size; an early and late bloomer. This we consider one of the best ten Dahlias. Very showy in the garden.

MINOS—One of the finest Dahlias to date. Flowers are large and exceedingly beautiful, borne on long, graceful, wiry stems. The color is intense velvety maroon, almost black. An ideal cut-flower variety. Fine for all uses.

MINA BURGLE—(New.) The best scarlet-red decorative Dahlia ever introduced. This wonderful Dahlia is a California introduction and is the best of its color. The form is perfect decorative type, the petals being broad and flat; it has a perfectly full center and is a Dahlia that can be grown to

an immense size with ordinary treatment. It was very prominent at the Panama-Pacific International Exposition where it was grown in masses around the Horticultural building. It shows finely under artificial light and for cutting purposes is unsurpassed. We were fortunate in securing a stock of the variety, and can highly recommend it to our customers.

MRS. J. GARDNER CASSATT—A new rose-pink Dahlia that has attracted great attention. The flowers are of immense size. Said by many to be the finest of all deep pink Dahlias.

PAPA CHARMET—(Charmet.) A very brilliant, deep coral-red, overlaid with a darker shade of velvety-maroon. The plant is a vigorous grower, with heavy, dark, glossy green foliage and a remarkable constitution. The general color effect being a rich crimson-maroon.

SOUVENIR DE GUSTAVE DOAZON—This is the largest of all Dahlias. A lovely shade of orange-red. A veritable giant among flowers.

SYLVIA (or Dolly)—Flowers four to six inches in diameter; of fine form and full to the center, which is white, shaded to soft pink on the outer petals. In freedom of bloom next to the Countess of Lonsdale. A magnificent Dahlia.

WILLIAM AGNEW—Intense glistening crimson-scarlet, of large size, and gracefully recurving form. The most popular standard red.

ZULU—The blackest of all Dahlias.

Buxus

(Ornamental Box.)

(*Sempervirens*)—Useful for edging and bordering walks, etc. A handsome shrub with deep green foliage. This is not as dwarf as the *Sempervirens* Nana, but we find it so much more vigorous and hardy that we advise planting this and trimming to height required. Fine for individual plants can be trimmed into any shape desired. Dozen, \$1.00; hundred, \$6.00.

FLOWERING BEGONIAS

Price, two and one-quarter-inch pots, except where noted, \$1.00 per dozen; \$7.00 per hundred.

Begonias are fine to plant on the north side of the house or other building, or in front of porch where they get shade. The foliage, as well as the flowers are extremely ornamental, some being spotted and veined to give a parti-colored effect that is quite striking. Begonias planted with Crotons give a wonderful foliage effect, and this is heightened with their lovely showy flowers.

ALBA PICTA—Long, pointed, slender leaves, thickly spotted with silvery-white. Foliage small and elegant.

ARGENTEA GUTTATA—It has purple-bronze leaves, oblong in shape, with silvery markings, and is in every way a most beautiful Begonia. Produces white flowers in bunches on ends of growth stems. Good for house culture.

CORALLINE LUCERNE, the Grand New Ever-blooming Begonia—This is the grandest of all flowering Begonias. A strong, vigorous grower, with stiff stems and upright habit. The green foliage is long and pointed, freely dotted with silvery-white. The flowers are borne in great clusters from 12 to 18 inches across, almost hiding the plant. The color is a beautiful, bright coral-red of a heavy waxen texture. This variety is one of the most prolific bloomers of all the large growing Begonias. Its freedom in blooming, the large, rich and showy foliage combined, make it an excellent decorative plant for the house or conservatory, and it should find its place in every collection. \$2.00 per dozen; \$15.00 per hundred.

MRS. PATTEN (The Red Chatelaine)—This is the freest flowering Begonia of all. Dark rosy red flowers. Fine for florists' pot plants. Always in bloom. \$1.00 per dozen; \$8.00 per hundred.

MRS. TOWNSEND—Broad foliage; profusion pink flowers. \$1.50 dozen.

PICTA ROSEA—A wonderfully free-growing Begonia of sterling worth and great beauty. The plant is very compact in growth, forming a dense, well-proportioned bush with rich green foliage, spotted with silver. The flower is a rosy-flesh color, shaded with a silvery-pink and enlivened with dense clusters of yellow anthers. One of the most wonderful flowering Begonias within our knowledge. It blooms continually.

RUBRA—The most widely known and probably the best of all Begonias. This variety is usually very scarce and in great demand. We have a fine stock of it. Dozen, \$1.00; hundred, \$7.50.

THURSTONI—The under side of the leaves is a rich, purplish-red, the veinings very prominent, while the face, or upper side, is a bronzy-green, shaded with crimson and olive, with a peculiar glossy metallic luster over all. Flowers rosy-white, in large clusters well above the foliage. The plant has a fine habit.

Brugmansia, or Angel's Trumpet

Here is a plant for the masses. It grows easily, blooms freely, and the flower is something to be proud of. The *Brugmansia* blooms indoors in winter and in the garden in summer. The plant has large, tropical leaves, with blooms eight inches long by six inches wide at the mouth, resembling a trumpet, hence the name, "Angel's Trumpet." Pure white in color and as fragrant as a Jasmine. Strictly a plant for tubs. \$1.50 per dozen; \$10.00 per hundred.

Coleus

Our stock of *Coleus* has never been equal to the demand, but this year we have a larger stock than any previous year, and we think we can meet the wants of our customers. Two and one-quarter inch pots, dozen, 50 cents; hundred, \$3.50; thousand, \$30.00.

New Giant Coleus, Christmas Gem

(Brilliancy, or Dr. Ross)

Leaves immense, eight to twelve inches long, looks like a *Rex Begonia*, and is just as beautiful. Cannot be excelled as a pot plant. The name aptly describes the appearance of this variety, which belongs to the giant-leaved section; of strong, vigorous habit, growing from two to three feet high, with leaves often nine to ten inches long, which are of bright carmine, shading off to a deep maroon, the margin being yellow and green, the whole leaf having a rich velvety luster. 75 cents per dozen; \$5.50 per hundred.

COLEUS TRAILING QUEEN—This is without question the finest of all plants for boxes, baskets or vases; it droops and hangs down two feet or more, not one little vine, but a whole clump of them. Try it. 50 cents per dozen; \$3.50 per hundred.

COLEUS TRAILING BEAUTY (New)—The same as *Trailing Queen* in every respect except the color, this being green, yellow and white. A fine companion of *Trailing Queen*, and equally showy. Dozen, 50 cents; hundred, \$3.50.

Cestrum Laurefolia

(Night Blooming Jasmine.) A much esteemed summer bedding plant, with waxy dark green leaves and open panicles of tubular, creamy white flowers. Although inodorous during the day, they fill the whole garden with fragrance at night. 75 cents per dozen; \$5.00 per 100.
